A digital car salesperson. The dealer’s terms.

Kopilotti Sales is a digital car salesperson and a sales channel for dealerships. It negotiates and accepts a price on the dealer’s behalf, within the authority and limits set by the dealer.

Not a chatbot | **Not dynamic pricing** | **Dealer keeps control**

01 **Vehicle listing**
list price or price negotiation

02 **Agreed price**
Sales accepts within dealer authority

03 **Contract and signature**
using the dealer’s selected services

04 **Payment or financing**
funds directly to the dealership

05 **Handover**
arranged with the customer

ONE-PAGE OVERVIEW

Price agreed — the dealership completes the sale.

Sales agrees the price under the dealer’s authority. The salesperson does not need to restart the same negotiation. The contract, electronic signature and payment or financing use the dealer’s systems and selected providers.

PROBLEM 01

Negotiation interrupts the digital journey

Search, finance and checkout can be digital, yet price progression often still waits for a salesperson or trade-in manager.

PRODUCT 02

A dealer-authorised sales channel

List price or negotiation leads to an agreed price. This does not yet mean a signed contract, payment or handover. People handle exceptions.

WHY DIFFERENT 03

AI without pricing authority

Natural-language interaction can move fast without delegating margin decisions to a model. The dealer defines the rules; software applies them.

ROLLOUT READINESS

Non-binding demo. The current purchase path stops before real payment. The atomic deal-record path is tested but not connected to customer journeys. Availability, data handoff and completion services must be verified before commercial rollout.
